

Administration And Training

Our Fleet Management Information System gives you complete visibility over the performance and costs of your fleet, in a single centralised system. Our easy-to-access web-based solution empowers your team with a comprehensive range of fleet management tools to make their job easier. Manuals are available for technical and non technical end users.

FleetPro is pre-integrated into dozens of third-party fuel and vehicle data providers, giving you a single view of your fleet. You gain control of your fleet performance and

operations while eliminating reliance on paper documents, spreadsheets and manual administration. The solution is easily integratable to any financial systems (ERP).
